

Year 8 Autumn Term 1

Department: Mathematics

Unit of Work: Whole number theory

Projection Grades 1-3	Projection Grades 4-6	Projection Grades 7-9
<ul style="list-style-type: none"> <li>• Use mental calculation strategies to solve number problems including those involving money and measures</li> <li>• Choose the appropriate operation when solving addition and subtraction</li> <li>• Multiply and divide two digit numbers by 2, 3, 4 or 5 as well as 10 with whole number answers and remainders</li> <li>• Use mental recall of addition and subtraction facts to 20 in solving problems involving larger numbers</li> <li>• Solve whole number problems including those involving multiplication or division that may give rise to remainders</li> <li>• Use the knowledge that subtraction is the inverse of addition and understand halving as a way of 'undoing' doubling and vice versa</li> <li>• Use mental recall of addition and subtraction facts to 10.</li> </ul>	<ul style="list-style-type: none"> <li>• Use efficient written methods of addition and subtraction and of short multiplication and division</li> <li>• Multiply a simple decimal by a single digit</li> <li>• Solve problems with or without a calculator</li> <li>• Check the reasonableness of results with reference to the context or size of numbers</li> <li>• Derive associated division facts from known multiplication facts</li> <li>• Add and subtract two digit numbers mentally</li> <li>• Add and subtract three digit numbers using written method</li> <li>• Calculate percentages and find the outcome of a given percentage increase or decrease</li> <li>• Add and subtract fractions by writing them with a common denominator, calculate fractions of quantities (fraction answers), multiply and divide an integer by a fraction</li> <li>• Use a range of mental methods of computation with all operations</li> <li>• Recall multiplication facts up to <math>10 \times 10</math> and quickly derive corresponding division facts.</li> </ul>	<ul style="list-style-type: none"> <li>• Understand the effects of multiplying and dividing by numbers between 0 and 1</li> <li>• Add, subtract, multiply and divide fractions</li> <li>• Make and justify estimates and approximations of calculations; estimate calculations by rounding numbers to one significant figure and multiplying and dividing mentally</li> <li>• Use a calculator efficiently and appropriately to perform complex calculations with numbers of any size, knowing not to round during intermediate steps of a calculation</li> <li>• Use place value to make approximations</li> <li>• Recognise negative numbers in contexts such as temperature</li> <li>• Use simple fractions that are several parts of a whole and recognise when two simple fractions are equivalent</li> <li>• Begin to use decimal notation in contexts such as money</li> <li>• Solve problems involving calculating with powers, roots and numbers expressed in standard form, checking for correct order of magnitude and using a calculator as appropriate.</li> </ul>

<p>Projection Grades 1-3</p>	<p>Projection Grades 4-6</p>	<p>Projection Grades 7-9</p>
<ul style="list-style-type: none"> <li>• Understand and use probability</li> <li>• In probability, select methods based on equally likely outcomes and experimental evidence, as appropriate</li> <li>• Understand and use the probability scale from 0 to 1.</li>   <li>• Classify 3-D and 2-D shapes in various ways using mathematical properties such as reflective symmetry for 2-D shapes</li> <li>• Begin to recognise nets of familiar 3-D shapes, e.g. cube, cuboid, triangular prism, square-based pyramid</li> <li>• Recognise shapes in different orientations and reflect shapes, presented on a grid, in a vertical or horizontal mirror line</li> <li>• Describe position and movement</li> <li>• Use a wider range of measures including non-standard units and standard metric units of length.</li> </ul>	<ul style="list-style-type: none"> <li>• Find and record all possible mutually exclusive outcomes for single events and two successive events in a systematic way</li> <li>• know that the sum of probabilities of all mutually exclusive outcomes is 1 and use this when solving problems.</li>   <li>• Use the properties of 2-D and 3-D shapes</li> <li>• Make 3-D models by linking given faces or edges and draw common 2-D shapes in different orientations on grids</li> <li>• Reflect simple shapes in a mirror line, translate shapes horizontally or vertically and begin to rotate a simple shape or object about its centre or a vertex</li> <li>• Choose and use appropriate units and instruments</li> <li>• Find perimeters of simple shapes and find areas by counting squares</li> <li>• Use a wider range of properties of 2-D and 3-D shapes and identify all the symmetries of 2-D shapes</li> <li>• Use language associated with angle and know and use the angle sum of a triangle and that of angles at a point</li> <li>• Measure and draw angles to the nearest degree, when constructing models and drawing or using shapes</li> <li>• Solve problems involving the conversion of units and make sensible estimates of a range of measures in relation to everyday situations</li> <li>• Understand and use the formula for the area of a rectangle and distinguish area from perimeter.</li> </ul>	<ul style="list-style-type: none"> <li>• Understand relative frequency as an estimate of probability and use this to compare outcomes of an experiment</li> <li>• Know when to add or multiply two probabilities</li> <li>• Use tree diagrams to calculate probabilities of combinations of independent events.</li>   <li>• Classify quadrilaterals by their geometric properties</li> <li>• Solve geometrical problems using properties of angles, of parallel and intersecting lines, and of triangles and other polygons</li> <li>• Identify alternate and corresponding angles; understand a proof that the sum of the angles of a triangle is <math>180^\circ</math> and of a quadrilateral is <math>360^\circ</math></li> <li>• Enlarge 2-D shapes, given a centre of enlargement and a positive whole number scale factor</li> <li>• Know that translations, rotations and reflections preserve length and angle and map objects onto congruent images</li> <li>• Deduce and use formulae for the area of a triangle and parallelogram.</li> <li>• Know and use the formulae for the circumference and area of a circle</li> <li>• Understand the difference between formulae for perimeter, area and volume in simple contexts by considering dimensions.</li> </ul>
